Response to your letter.

Dear Sir,

The C.D.C. is very happy to learn from your letter that our report is confirmed. May I assure you that this committee will continue doing so. May I also report that we have done everything you asked us to do, you will again get full report from Dr. Ehaet again. In this report we have shown all expenditures from 2005 - Dec. 2006 and also our income from 25% self contribution for the same period.

Sir, I want you to know that our budget has now been fulfilled, this is so because at last we had a chance of getting coupons from ministry of agriculture to buy cheaper fertilizer. For this reason now we are able to buy 44 mattresses at once. May I report that C.D.C has an account with Malawi Savings Bank by the name of Grace Charity, the account no is 491207332420001. This means all the money will be transferred to this account now.

Grace is highly appreciated by all employees and their families for the assistance they get from grace. Imagine that people will now sleep on nice Mattresses they have never slept on before, not forgetting Pangg Unives, hoer, and how enjoyable our wives are when they use cooking Pots, plates and Cups in the kitchen, Fertilizer gives us good harvest, Our boys and girls enjoying Secondary school lessons without school fees problems. Hospital bills being paid for employees and their families in time. All what I have mentioned above are very important to us. May you please convey our most thankfulness to all donors of Grace Charity.

Commenting on your annual general meeting, CDC wish a very successful meeting in all the agendas you have outlined. It is good to discuss C.M.C. issue because women are just waiting for us. Indeed Vocational training for our children will be very important at your meeting, because as you are aware that our boys and girls have nothing to do after school due to problems of getting employed. As a result of this our youth just wander around Chipungu without doing anything. For your information, the youth Vocational Centre hall is completed which was under construction. But it is empty without furniture in it.

Building of a school block at Chipunga is a very welcome issue, which must be fully discussed at your meeting, since the school lacks school blocks and teacher's houses as well. This is the only school where our children go to learn.

C.D.C. Convinced a meeting where we invited the school committee, Parental Teachers Association (P.T.A.) Committee, Teachers and Village headmen in order to hear their views on the issue. The meeting was held at Chipunga Primary School on 11-02-007. These people were very happy to hear the news and they ^{are} very willing to contribute to this project by mending more bricks to add on what they have already at the school. At the meeting it was discovered that the school also lacks the following things: Note books, Pencils, pens and water. The school committee told us that the ministry of ~~education~~ education accepts any plan of a school block or teachers house can be constructed at the school.

Thanks for your cooperation.

With warm regards

Watson C.M. Msiska
C.D.C. Secretary.
